- ⑦ **Applicant** – Trends, Performance, and Other Musings
- ⑧ **Where We Go From Here**

Project Overview

The Purpose and Scope of Work

1

Project Summary

Initially, we planned to deliver the analysis and recommendations over the course of four phases – Discovery & Preliminary Market Analysis, Data Onboarding & In-Depth Analysis, Insight Extraction & Strategic Planning, Optimization & Ongoing.

However, after conversations with TCL leadership around needs and urgency, the decision was made to consolidate, reprioritize and streamline these phases to provide actionable intel more quickly. Specifically, the need for the findings from Program Analysis became a clear immediate focus, which is reflected in this report.

An in-depth understanding of the TCL's market was needed to conduct the Program Analysis, and serves as the backbone for all subsequent deliverables. Thus, this report reflects what we know at this point in time, with a heavy focus on market and program.

Our conversations today and over the coming weeks will help inform the next phase of analysis and recommendations this project, resulting in a holistic perspective on where TCL is today and where it can go in the future.

State of the Union - Community Colleges

What does the landscape look like?

2

Important Distinction #1 - Technical College of the Lowcountry is considered a Town: Distant via IPEDS

Important Distinction #2 - The Designated Comparison Group in IPEDS is Associate's Colleges: Mixed Transfer/Career & Technical-High Traditional, public/3 of 3

**There are ~7,500 colleges in the US.
Only 1,200 are community colleges.**

The median change in enrollment
from 2011 to 2015 was **-13%**

934 schools have declined in enrollment from 2011 to 2015 at an average clip of **-19%**

242 schools have grown enrollment
from 2011 to 2015 at an average clip of +29%

Scrubbing out six outliers,
the average growth is **+19%**.

Among the 242 schools with growth, 46 are in CA, 18 in FL, 16 in NY, 14 in PA, and 11 in TX.

The surprise is the growth in TN with 22 schools, more than half of the schools in the system.

**Among the 242 schools with growth,
42% are in cities, and 18% are in large suburbs.**

**This is close to on par with the
national distribution of CCs.**

Locale Criteria - Percentage of Colleges & Enrollment

LOCALE	AGGREGATE		COMMUNITY COLLEGES	
	Percent of Colleges	Percent of Enrollment	Percent of Colleges	Percent of Enrollment
City: Large	23%	27%	13%	22%

Tuition as a % of Revenue

i TCL is less dependent on tuition for revenue share at 43%, compared to the median of 59% **i**

Tuition as a % of Expenses

TCL's 22% Tuition as a percent of Expenses is close to the median of 17%.

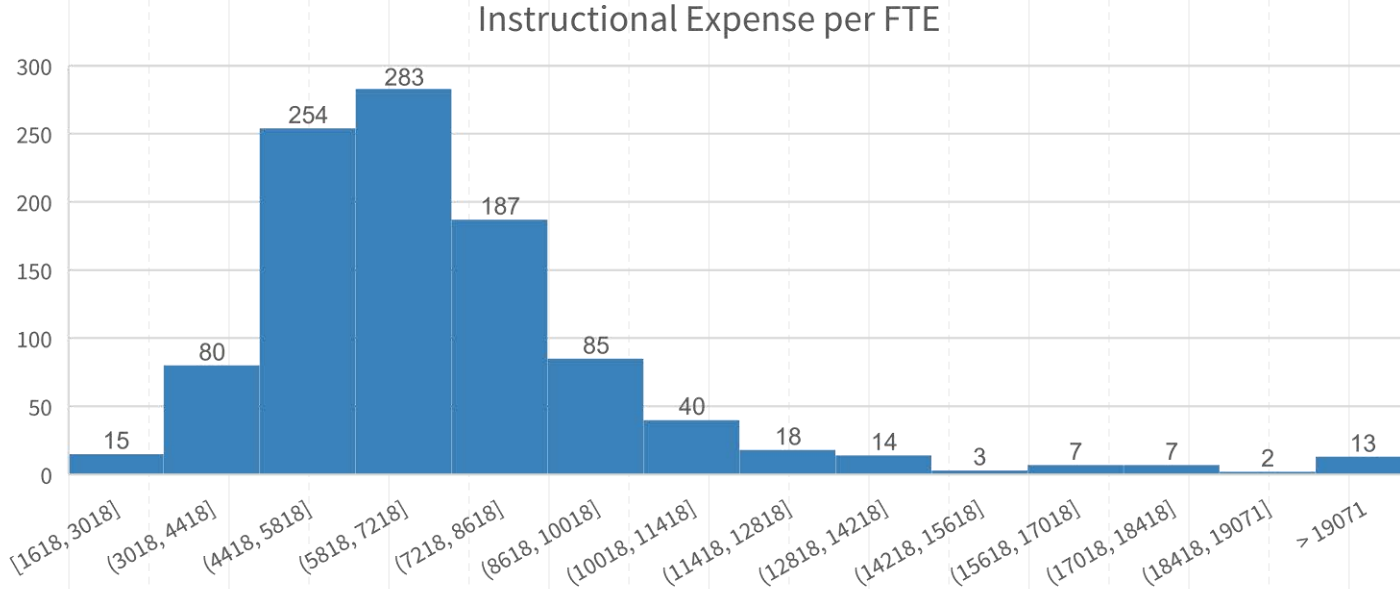

Tuition as a % of Expenses

Instructional Expenses per FTE

TCL's Instructional Expense per FTE is about \$6,700, putting them near the median of \$6,540

Academic Support per FTE

**TCL's Academic Support spend is around \$2,000 per FTE.
This is toward the higher end and above the median of \$1,264.**

Academic Support per FTE

Student Services per FTE

**TCL's Student Services spend is around \$3,200 per FTE.
This is on the far end of the tail, with the all CC median at \$1,589.**

Student Services per FTE

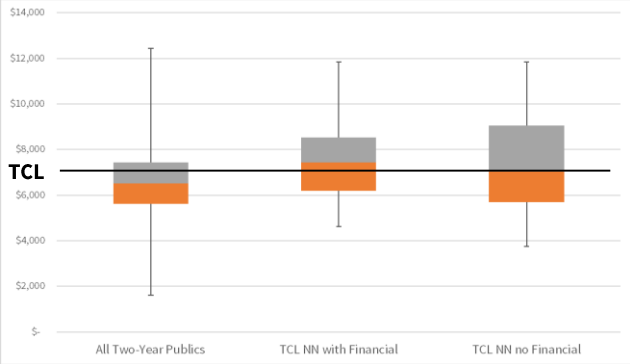

Dollars per FTE Plots

Note that TCL is above the 75th percentile relative to peer institutions.

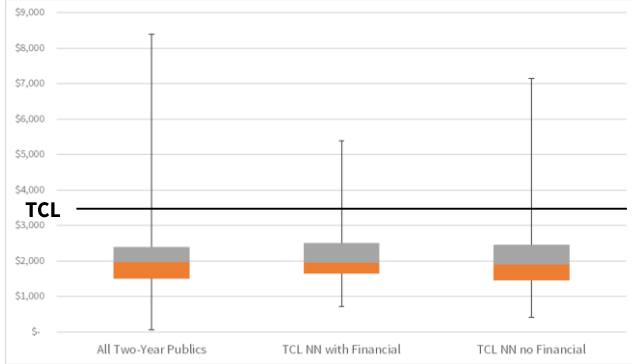

Instructional \$ per FTE

Academic Support \$ per FTE

Student Services \$ per FTE

The Market

Trends, Reach, and Market Personas

4

Included in this section

- ◆ Market Report – Epsilon – Demographics, Lifecycle, Financial, etc.
- ◆ Geographic reach of campuses relative to the MSA
- ◆ Market Personas – what distinguishes those in the MSA not distinguished by county

Home Ownership

Not much in the way of differences here; most are homeowners.

Household Composition

Allendale has a slightly higher concentration of one-individual households.

Dwelling Type

There is some noteworthy variability regarding dwelling type.

Time in Dwelling

Those outside of Beaufort county have been around longer.

Household Composition

Non-TCL ratio of single mothers to fathers is 2.5 to 1, which is relatively consistent to all counties except Allendale, which is nearly 4 to 1 (Hampton = 3.1 to 1; Jasper = 3.2 to 21)

Educational Background

As expected, the variability of educational background is evident.

Ethnicity Distribution

There is also great variability in ethnicity distribution by county.

Non-TCL SC

TCL Footprint

Beaufort

Allendale

Colleton

Hampton

Jasper

Income Distribution

As expected, income disparities are evident between counties.

Net Worth Distribution

The same can be said of Net Worth.

Non-TCL SC
TCL Footprint
Beaufort
Allendale
Colleton
Hampton
Jasper

Short Term Debt Distribution

And debt load.

Let's see the Market Personas

Starting Humble

Single, No Kids, Low Income, Early Stage

Seeking Opportunity Jasper

(n = 15K)

- ◆ **Xennials; Gen X; Millennials**
- ◆ **More Male (58%)**
- ◆ **All Single (100%); No Kids (100%)**
- ◆ **Unknown Profession**
- ◆ **Lowest Income (\$18.6K), Lowest Wealth Trend, High Debt; Modest Home Value (high mobile home)**
- ◆ **Large African American (31%); Lowest Beaufort (31%); 31% Colleton; 16% Jasper; 9% Allendale**
- ◆ **High School (69%); Some College (21%)**
- ◆ **Heavy Social Media - Socially Active on Facebook (Category Recommenders)**
- ◆ **Cord Cutters**
- ◆ **Job switchers**
- ◆ **Budget and convenience meals**
- ◆ **Price sensitive – will price match; stock up at Wal-mart**
- ◆ **Paycheck to paycheck; underbanked**
- ◆ **In the market for a home**
- ◆ **Work for small company**
- ◆ **Impulse purchasers**
- ◆ **Price and budget conscious**

Breaking Out Brenda

(n = 11K)

- ◆ **Xennials; Millennials; Gen X**
- ◆ **Mostly Female (89%)**
- ◆ **All Single (100%); No Kids (100%)**
- ◆ **Unknown Profession**
- ◆ **Lower Income (\$35K), Lowest Wealth Trend, High Debt; Modest Home Value**
- ◆ **Mostly white; mostly Beaufort (79%)**
- ◆ **Some College (61%); High School (24%)**
- ◆ **Heavy Facebook Usage – Likers and Recommenders**
- ◆ **Cord Cutters**
- ◆ **Job Switchers**
- ◆ **Gamers**
- ◆ **Independent Voters**
- ◆ **Paycheck to paycheck**
- ◆ **Underbanked**
- ◆ **Student loans**
- ◆ **Future investors**
- ◆ **In the market for a home**
- ◆ **Online education seekers**
- ◆ **Price and Budget Conscious**

Getting By

Married w Kids, Lower Income, Established/Later

Getting by Good Christians

(n = 14K)

- ◆ **Xennials, Gen X, Pre-Retirement**
- ◆ **Most married (79%); Most Kids (79%)**
- ◆ **Modest Income (\$47K) and Wealth, lower debt; Most Modest House Value (Largest mobile home %)**
- ◆ **Largest African American (31%), lowest Beaufort (42%); 31% Colleton**
- ◆ **High School and Some College**
- ◆ ***Socially active on Pinterest and Twitter and a brand liker on Facebook***
- ◆ ***Book and Magazines***
- ◆ ***Religion is large part of life – read Bible devotionals regularly and enjoy Christian or Gospel music***
- ◆ ***Donate to children's, animal welfare and veteran's causes***
- ◆ ***Master cook***
- ◆ ***Paycheck to paycheck***
- ◆ ***Bundler***
- ◆ ***Multiple devices***
- ◆ ***Price driven and bargain hunting***

Getting by Gentrys

G1 (n = 23K)

- ◆ **Xennials, Gen X, Millennials**
- ◆ **Simple majority married (58%); Most Kids (72%)**
- ◆ **Lower Income (\$38K) and Wealth, high debt; Most Modest House Value (Largest mobile home %)**
- ◆ **Largest African American (28%), lowest Beaufort (46%)**
- ◆ **High School and Some College**
- ◆ ***Heavy Facebook Usage – Likers and Recommenders***
- ◆ ***Job switchers***
- ◆ ***Cord cutters***
- ◆ ***Master cook***
- ◆ ***Gamer***
- ◆ ***In market for home loan***
- ◆ ***Underbanked and future investors***
- ◆ ***Paycheck to paycheck***
- ◆ ***Works for a small company***
- ◆ ***Price and bargain hunters***
- ◆ ***Social media and mobile browsers***
- ◆ ***Online degree seekers***
- ◆ ***DIY'ers***

Single Middle Class

Single, No Kids, Middle Class, Established

Humble Hailey

(n = 9K)

- ◆ Gen X (39%); Pre-Retirement (26%); Xennials (23%)
- ◆ Female (96%)
- ◆ All Single (100%); No Kids (100%)
- ◆ Unknown occupation
- ◆ Middle Class Income (\$91K), Variable Wealth Trend, Variable Debt; Modest Home Value
- ◆ Mostly white; mostly Beaufort (88%)
- ◆ Some College (45%); College (42%)
- ◆ *Ridiculously active on social media – brand likers and recommenders; on FB, Twitter and Pinterest*
- ◆ *Tech early adopters and cord cutters*
- ◆ *Heavy mobile*
- ◆ *Wellness household*
- ◆ *Live music attendees & Cultural Arts/Events*
- ◆ *In the market for a home*
- ◆ *Student loans*
- ◆ *Natural/green products*
- ◆ *Organic products*
- ◆ *Diet conscious*

Humble Harry

(n = 12K)

- ◆ Gen X (38%); Xennials (26%); Pre-Retirement (20%)
- ◆ Male (100%)
- ◆ All Single (100%); No Kids (100%)
- ◆ Unknown occupation
- ◆ Middle Class Income (\$89K), Variable Wealth Trend, Variable Debt; Modest Home Value
- ◆ Mostly white; mostly Beaufort (83%)
- ◆ Some College (49%); College (32%)
- ◆ *Cord cutters*
- ◆ *Experimental cooks*
- ◆ *In the market for a home*
- ◆ *Future Investors*
- ◆ *Price sensitive*
- ◆ *Brand loyalists*

Married with Kids, Upper Middle, Later Stage

Middle Class Techies

(n = 21K)

- ◆ Gen X (32%), Xennials (25%), Pre-Retirement (24%)
- ◆ Majority Married (80%); Majority Kids (64%)
- ◆ Middle Class to Strong Income (\$114K), Strong Wealth Trend, Variable Debt; Modest Home Value
- ◆ Mostly white; mostly Beaufort (78%)
- ◆ Some College (49%); High School (24%); College (24%)
- ◆ *Likely living below their means*
- ◆ *Tech early adopters and wearable users; high usage of digital media, etc.*
- ◆ *Extreme fitness*
- ◆ *Online and mobile frequents*
- ◆ *In the market for a home or auto loan*
- ◆ *401K and 529 plans*
- ◆ *Spend on vacations*
- ◆ *Brand loyalists*
- ◆ *New luxury vehicle purchasers*

Middle Class Good Christians

(n = 14K)

- ◆ Pre-Retirement (35%); Gen X (27%); Xennials (14%)
- ◆ Majority Married (89%); Majority Kids (59%)
- ◆ Professional/Technical or Management
- ◆ Middle Class to Strong Income (\$102K), Strong Wealth Trend, Variable Debt; Modest Home Value
- ◆ Mostly white; mostly Beaufort (67%)
- ◆ High School (36%); College (31%); Some College (25%)
- ◆ *Religion is large part of life - read Bible devotionals regularly and enjoy Christian or Gospel music*
- ◆ *Active on social media - Pinterest is tops*
- ◆ *Tech early adopters*
- ◆ *Avid readers of books and magazines*
- ◆ *Football enthusiasts*
- ◆ *Pet owners*
- ◆ *Master cooks*
- ◆ *Give to animal welfare, cancer, children's, and veterans*
- ◆ *401K and Mutual Funds*
- ◆ *Owns multiple devices*
- ◆ *Bundler*

Single or Married, No Kids, Lower Class, Retired

Struggling Elderly

(n = 8.6K)

- ◆ **Enjoying Retirement; Early Retirement; Pre-Retirement**
- ◆ **More Female (66%)**
- ◆ **All Single (100%); No Kids (100%)**
- ◆ **Unknown Profession**
- ◆ **Lowest Income (\$15K), Lowest Wealth Trend, Low Debt; Modest Home Value (high mobile home)**
- ◆ **Large African American (29%); Lowest Beaufort (41%); 28% Colleton; 13% Hampton; 12% Jasper**
- ◆ **High School (64%); Some College (23%)**
- ◆ **Wired lines**
- ◆ **Causes – children’s, cancer, veterans, animal welfare**
- ◆ **Religion is large part of life – read Bible devotionals regularly and enjoy Christian or Gospel music**
- ◆ **Master and experimental cooks**
- ◆ **Price sensitive and discount seeking buyers**
- ◆ **Medicare and Medicare Advantage**
- ◆ **Medicaid Potential**
- ◆ **Paycheck to paycheck**
- ◆ **Work for a small company**

Getting by Retirement

(n = 16.6K)

- ◆ **Pre-Retirement, Early Retirement, Enjoying Retirement**
- ◆ **Most married (83%); Most No Kids (86%)**
- ◆ **Lower Income (\$25.5K) and Wealth, low debt; Most Modest House Value (Largest mobile home %)**
- ◆ **Largest African American (32%), lowest Beaufort (31%); 32% Colleton; 17% Hampton**
- ◆ **Mostly high school education (70%)**
- ◆ **Retired but still working**
- ◆ **Religion is large part of life – read Bible devotionals regularly and enjoy Christian or Gospel music**
- ◆ **Donate to veterans**
- ◆ **Avid book readers**
- ◆ **Football enthusiasts**
- ◆ **Medicaid eligible household**
- ◆ **Work for a small company**
- ◆ **Paycheck to paycheck**
- ◆ **Price driven and bargain hunting**

Single or Married w No Kids, Middle, Retirement

Humble Retiring

(n = 7K)

- ◆ **Enjoying Retirement (39%), Early Retirement (37%); All Single (100%); No Kids (100%); Split Male/Female; Retired or Professional/Technical; Middle Class Income (\$65K), Variable Wealth Trend, No Debt; Modest Home Value; Mostly white; mostly Beaufort (87%); College (58%); Some College (24%)**
- ◆ *Likely living below their means*
- ◆ *Retired but still working*
- ◆ *Election and politics heavy*
- ◆ *Wellness household*
- ◆ *Cultural Arts/Events*
- ◆ *Environmental donor/Environmentally focused*
- ◆ *Conservative investment style*
- ◆ *Natural/green products*
- ◆ *Organic products*
- ◆ *Brand loyalists*
- ◆ *Non-luxury vehicle purchasers*
- ◆ *Traveling/International Travel*

Middle Class Retirement

(n = 17K)

- ◆ **Enjoying Retirement (42%), Early Retirement (37%); Majority Married (92%); No Kids (93%); Retired or Professional/Technical; Middle Class Income (\$70K), Strong Wealth Trend, No Debt; Modest Home Value; Mostly white; mostly Beaufort (72%); College (38%); High School (32%); Some College (19%)**
- ◆ *Likely living below their means*
- ◆ *Retired but still working*
- ◆ *Active in elections; more likely conservative*
- ◆ *High dollar religious causes donor*
- ◆ *Pets are family*
- ◆ *Avid book and magazine reader*
- ◆ *Master cook; diet conscious, fresh food, low fat, label readers, real ingredients, organic products*
- ◆ *Brand loyalists; loyal to financial institution and investment broker*

What do we know about geographic reach?

Closest Campus Reach

The closest campus is relatively spread out.

The closest campus is within...

**93% of the entire footprint is within 25 miles from a TCL campus;
more than half are within 10 miles, 76% within 15 miles.**

Population Reach by Mile Reach - Cumulative

**93% of the entire footprint is within 25 miles from a TCL campus;
more than half are within 10 miles, 76% within 15 miles.**

Distribution of Minimum Within

i The Hampton campus increases its reach as distance is separated from the other campuses. **i**
The main campus has the greatest bulk when within five miles.

 **Main** **Hampton** **New River**

Interpretation: "If closest campus minimum is within 5 minutes, this is the percentage of closest campus"

Distance from Closest Matching Campus

Main and New River have great coverage, keeping most of it's nearest neighbor population within 15 miles, with New River accounting for 100% at 20 miles.

Main

Hampton

New River

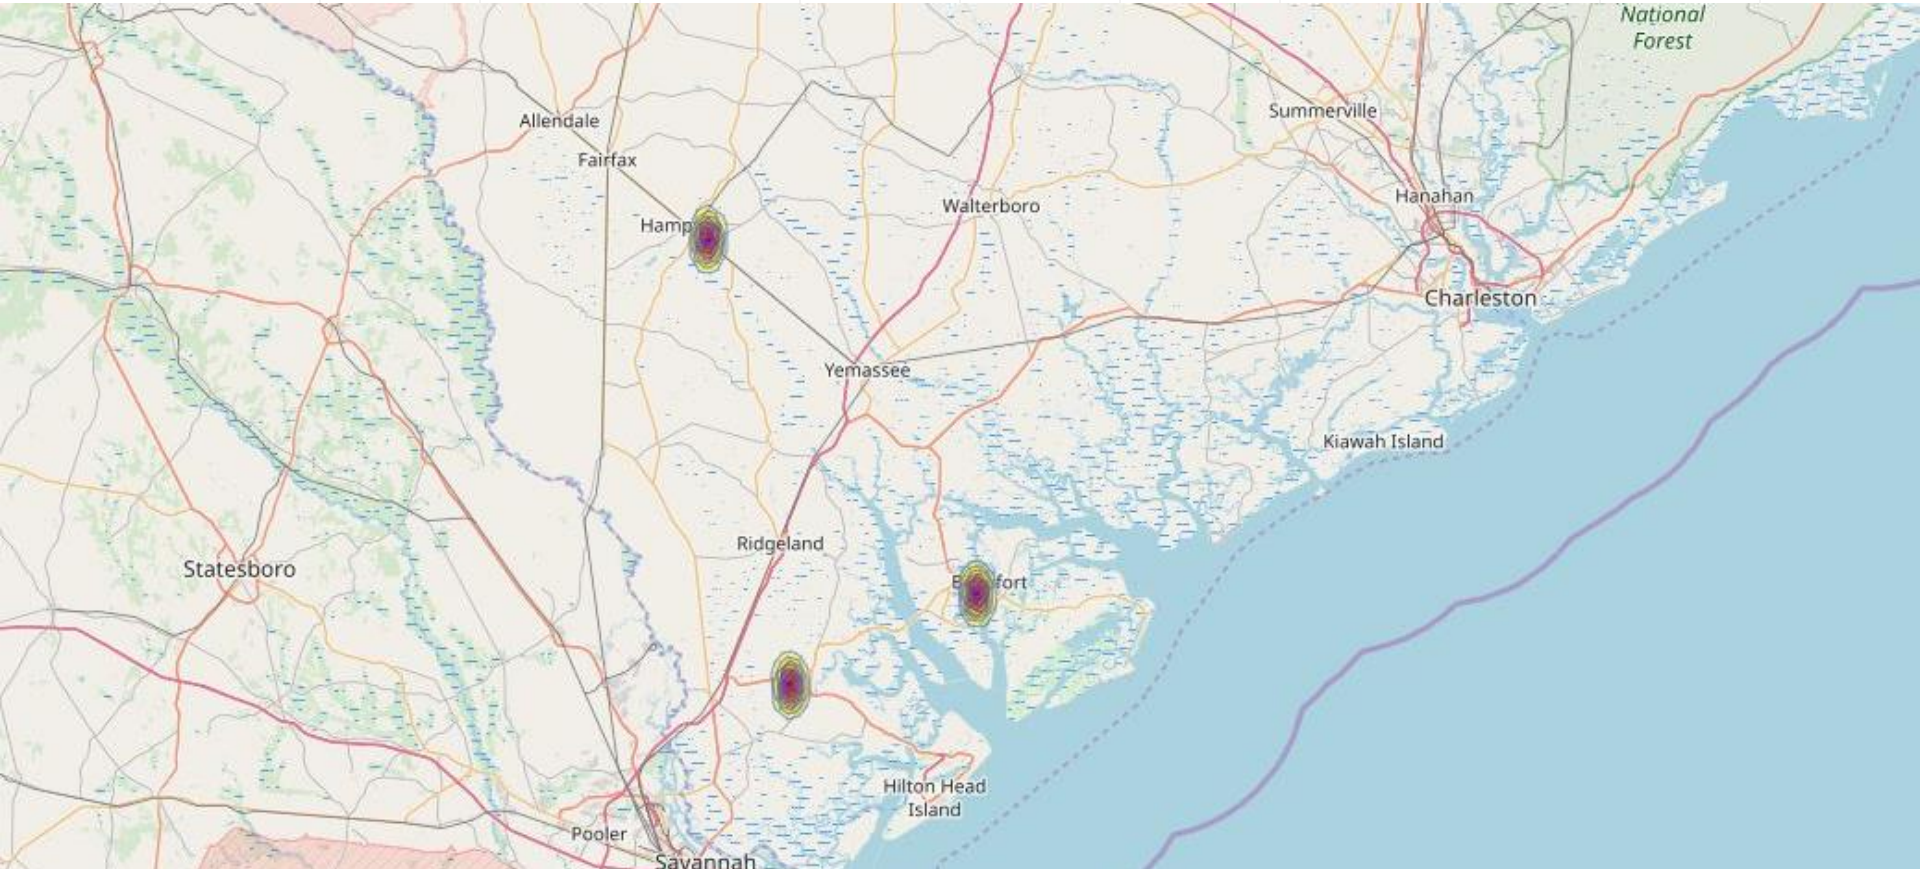

Interpretation: If X Campus is closest, this is the distance coverage for that campus

Here are the Campuses

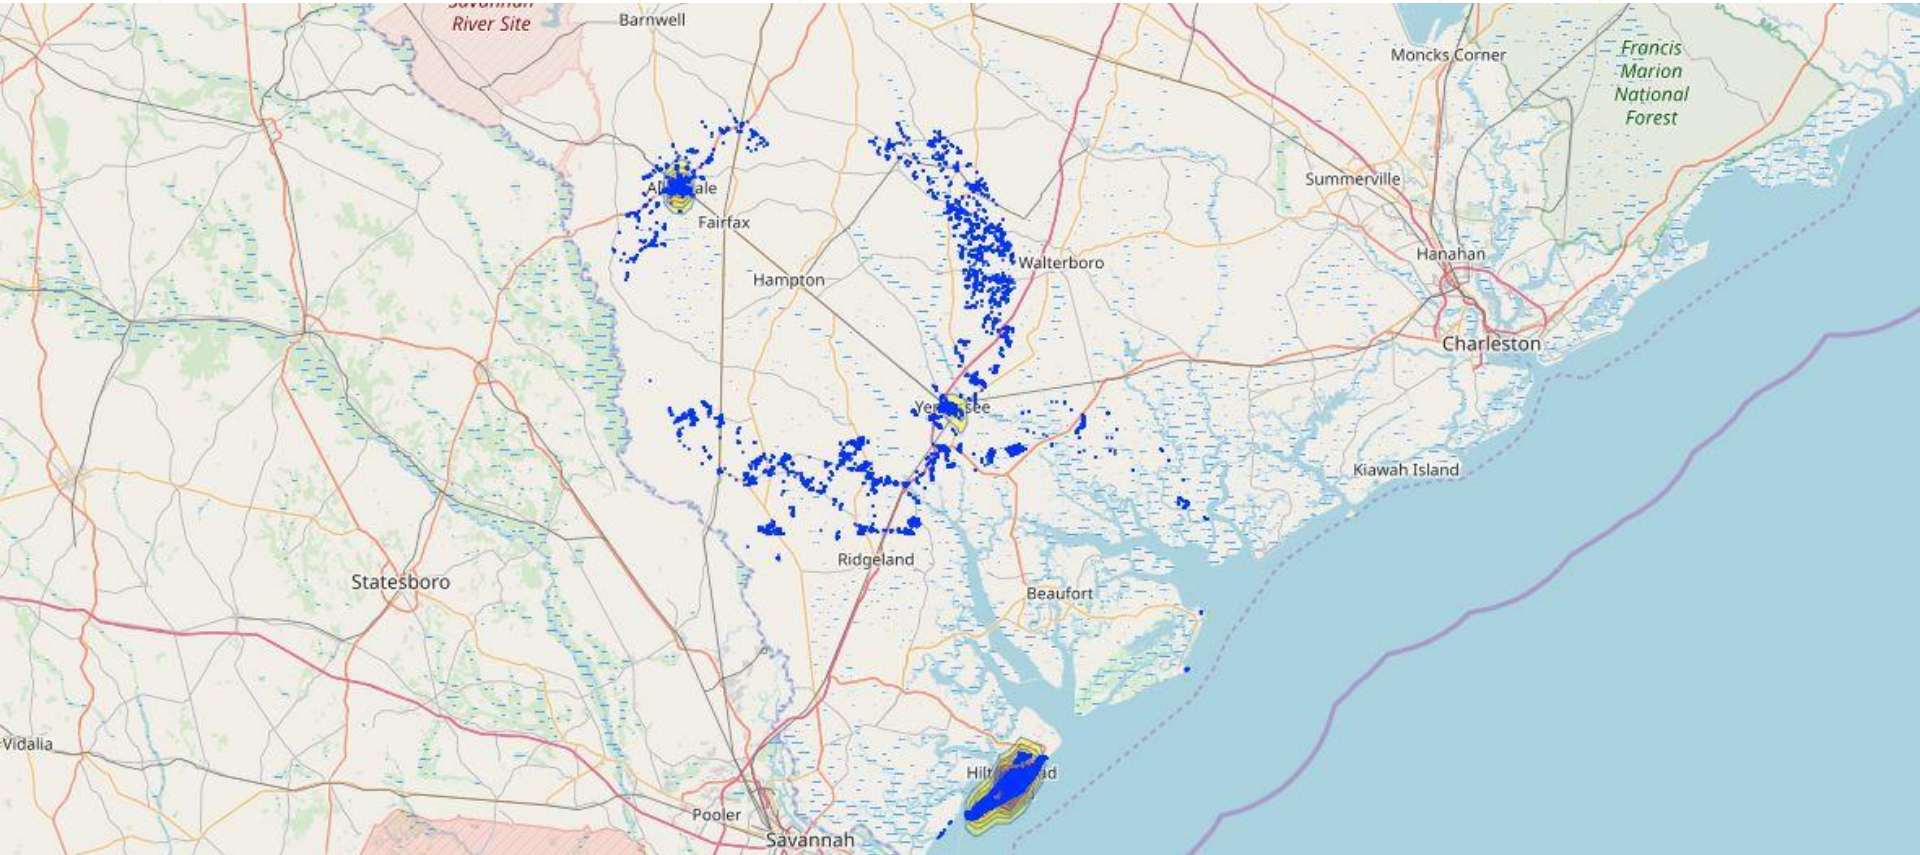

The campuses triangulate well and are situated well optimally relative to population density.

Here are those that live outside of 20 miles

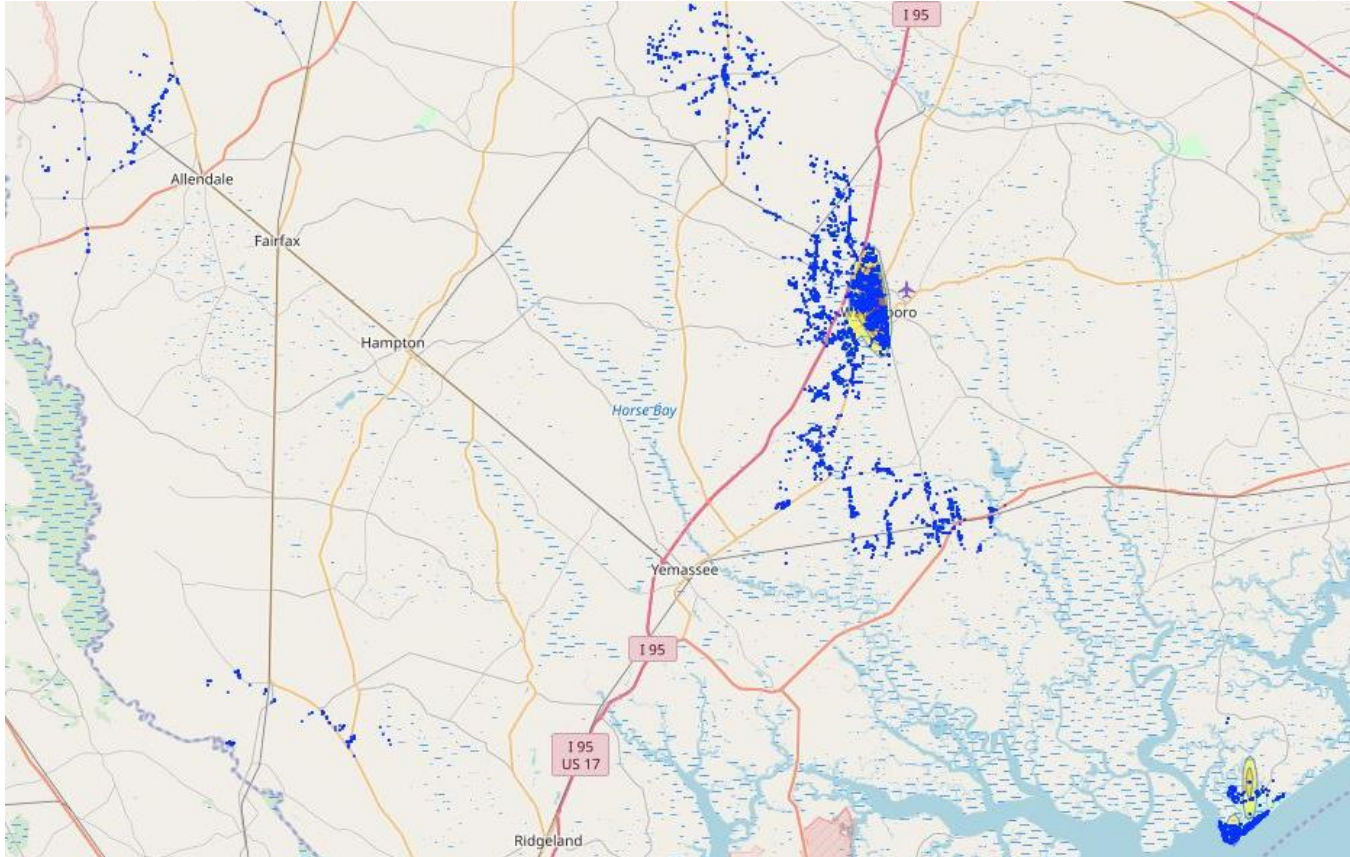

Two major clusters and a minor cluster exist, in Allendale, deep into Hilton Head, and around Yemassee.

Here are those that live outside of 25 miles

The highest concentration is the Walterboro area just east of the airport with a small proportion on the coast and some outlier areas northwest of Allendale.

Program

Trends, Program Personas, and Performance

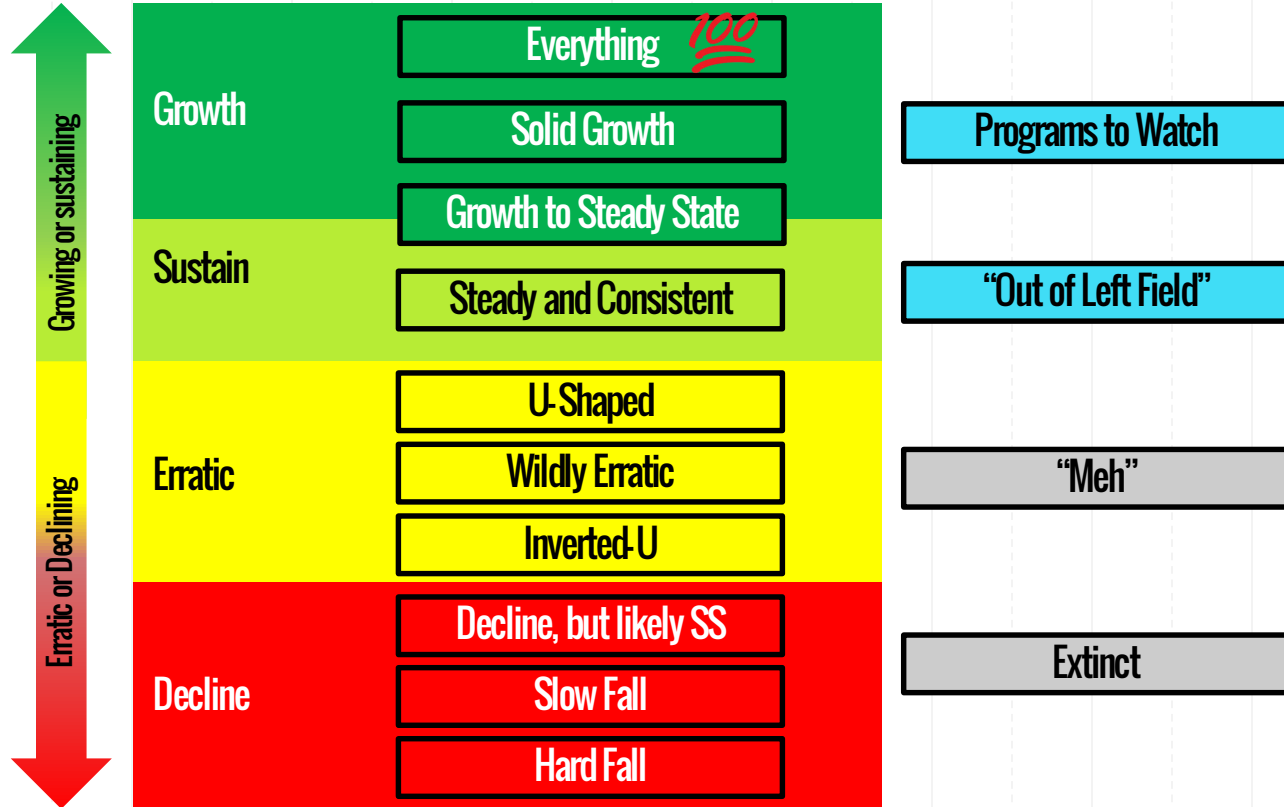

5

In this section...

- ◆ Program personas by trend, curve, etc.
- ◆ Program performance of TCL relative to multiple comparison groups
- ◆ A thorough review of the technical college system in this state
- ◆ Where is the state in terms of wins and positions of risk?
- ◆ Scoring trends across growth and decline

The Program Trend Model

% Composition: 13% of all Programs

@ TCL: 2 OF 13 Programs (Liberal Arts; PT Tech/Asst)

DEMAND: PEAK (85TH) → 69th (Lower 25) – 85th (Median) – 93rd (Upper 25)

Y-t-Y GROWTH: 100% Year-to-Year Growth

3-PERIOD TREND: 100% 3-Period Trend Growth

TOP CIP FAMILIES: 1) Health Professions; 2) Visual and Performing Arts; 2a) Agriculture; 4) Engineering; 4a) Engineering Technologies

Example Programs:

- Business Administration and Management, General
- Psychology, General
- Computer Science

BIO

The “Everything 100” group tend to be your traditional, tried-and-true, sustainable programs and high-demand and trending tech and engineering programs. Growing every year and continuing to trend up, these programs claim the highest aggregate demand among all groups, with 36% in the 90th percentile or higher, and another 34% in 75th or above. The key word is **General**. The word “General” appears in 30% of all programs in this category, which is 3X the total number of appearances, and good enough for 28% of all appearances. The word “Other” only appears in 6% of programs.

Surprisingly, TCL only has two programs in this group, a welcome opportunity to expand, notably in the tech area (where local demand is available), arts, social sciences, and business, with some heavy debate around health. These programs survived many spin-off niches that proved more fad than trend, proving that the traditional and high-demand technical are likely here to stay.

Solid Growth

GROWTH PROGRAM PERSONA #2

% Composition: 4% of all Programs

@ TCL: 1 Program (Industrial Electronics Tech); Culinary is also in this group

DEMAND: HIGH (78TH) → 66TH (Lower 25) – 78th (Median) – 88th (Upper 25)

Y-t-Y GROWTH: A majority of year-to-year (most grew in two-thirds of year-over-year)

3-PERIOD TREND: A majority of programs (87%) are in three-year trend growth.

TOP CIP FAMILIES: (1) Health Professions; (2) Business; (2a) Agriculture; (2b) Mechanic and Repair Tech

I love the smell of growth in the morning

Example Programs:

- Crisis/Emergency/Disaster Management
- Cyber/Computer Forensics and Counterterrorism
- Social Psychology
- Small Business Administration/Management

BIO

Much like “Everything 100,” The Solid Growth is tried-and-true, but come on more recently. Programs like crisis management, anything in cyber, and more specific areas of highly popular and in-demand programs like psychology and business are cropping up as a form of changing dynamics of the marketplace. We see some pivoting of CIPs here as well in the medical and technical, where Criminology emerges out of CJ, Logistics emerges out of Management, and Adult Health Nurse emerge out of the generalized Registered Nurse.

Growth to Steady State

GROWTH & SUSTAIN PROGRAM PERSONA #1

% Composition: 12% of all Programs

@ TCL: No programs

DEMAND: MODERATE (58TH) → 41st (Lower 25) – 58th (Median) – 72nd (Upper 25)

Y-t-Y GROWTH: Most programs growing in two-thirds of year over year periods.

3-PERIOD TREND: Most programs trending in two-thirds of 3-year periods.

TOP CIP FAMILIES: (1) Health professions; (2a) Visual and performing arts; (2b) Engineering tech; (2c) Agriculture; (5) Natural resources conservation

Example Programs:

- Athletic Training/Trainer
- Applied Psychology
- Dietetic Technician
- Fire Systems Technology

BIO

Moderate demand as these programs came out of flagship programs like computer science (to computer engineering), Real Estate and Management Science emerging from Business Administration, and more technical degrees emerge out of what was a more generalized program. A lot of looks in here to mimic four year degrees (chemical engineering, applied technology, etc.) that likely reached the point of sustainability. Likely to move into the Steady and Consistent group in the coming years, or we could see the market pivot back to the generalizable degree programs.

Steady and Consistent

SUSTAIN PROGRAM PERSONA #1

% Composition: 15% of all Programs

@ TCL: No programs

DEMAND: MODERATE (50TH) → 38TH (Lower 25) – 50th (Median) – 73rd (Upper 25)

Y-t-Y GROWTH: Slight fluctuation in year over year with minimal growth or decline.

3-PERIOD TREND: Slight fluctuation in trend with minimal growth or decline.

TOP CIP FAMILIES: (1) Health professions; (2) Agriculture; (3) Business; (4) Engineering Technology; (5) Communications, Journalism and Related Programs

What you see is what you get

Example Programs:

- Public Relations/Image Management & Advertising
- “Pre-” Health studies
- Retail Management

BIO

As the term implies on the graph, what you see is what you get. A pretty sound spread from 38th percentile to 73rd percentile, there is somewhat of a tit-for-tat year over year growth and decline that regresses to a natural value. There is virtually no linear curve trend, and if it is, it is more exponential or log. Lots of long run presence of pre-health studies (7 in total, including all the prominent ones in pharma, vet, nursing, OT, PT, dentistry, med). The word “Technician” also shows up here fourteen times...

U-Shaped

ERRATIC PROGRAM PERSONA #1

% Composition: 3% of all Programs

@ TCL: No Programs

DEMAND: MODERATE (64TH) → 54TH (Lower 25) – 64th (Median) – 67th (Upper 25)

Y-t-Y GROWTH: Better year to year growth than in trend.

3-PERIOD TREND: Erratic trends at the inflection points.

TOP CIP FAMILIES: (1a) Communications Technologies; (1b) Health Professions; (1c) Engineering Technology; (4) Visual and Performing Arts

Example Programs:

- Drawing
- Music Management
- Audiovisual Communications Technologies/Technicians, Other

BIO

A decline over time with a rebound in 2014/2015, these programs are potentially finding relevance again, or could prove to have regular large inflections and go into Wildly Erratic. Much in the arts and humanities here, with practically nothing showing up in business or health. While the programs could end up in Wildly Erratic, a year or two could prove regressing toward sustainability.

Wildly Erratic

ERRATIC PROGRAM PERSONA #2

% Composition: 10% of all Programs

@ TCL: One program (Data Processing and DP Tech)

DEMAND: MODERATE (60TH) → 52nd (Lower 25) – 60th (Median) – 75th (Upper 25)

Y-t-Y GROWTH: Most programs are growing in two-thirds or more of year over year periods.

3-PERIOD TREND: Erratic trend as multiple inflection points are evident.

TOP CIP FAMILIES: (1) Health professions; (2) Business; (3) Mechanic and Repair Technology; (4a) Visual and Performing Arts; (4b) Agriculture

Example Programs:

- Entrepreneurship/Entrepreneurial Studies
- E-Commerce/Electronic Commerce
- Accounting and Computer Science
- Social Work

BIO

Like the stock market, the Wildly Erratic is virtually a random walk. Here today, gone tomorrow, back up again, then anyone's guess as to what is next. No clear prediction about what will happen the following year, but trends indicate several key inflection points. At the aggregate level, this has two primary explanations. One, the fluctuation of adoption within the program, or two, niche programs that, with less emphasis within the institution, tend to decline until reminded otherwise. Entrepreneurship is the equivalent of the flagship definer of the Wildly Erratic, whereas Small Business Management is proving greater sustainability. There are also many programs deemed as a "calling" among students, which tend to have erratic enrollment, like social work and the decomposition of religious studies.

Inverted-U

ERRATIC PROGRAM PERSONA #3

% Composition: 4% of all Programs

@ TCL: No programs

DEMAND: MODERATE (59TH) → 40TH (Lower 25) – 59th (Median) – 78th (Upper 25)

Y-t-Y GROWTH: Year over year is less consistent than 3-period trends.

3-PERIOD TREND: Most programs are trending up two-thirds of periods.

TOP CIP FAMILIES: (1) Health professions; (2a) Engineering Technology; (2b) Homeland Security, Law Enforcement, etc.; (4a) Theology; (4b) Personal and Culinary Services; (4c) Agriculture

Example Programs:

- Library and Information Science
- Golf Course Operation and Grounds Management
- Solar Energy Technology/Technician
- System, Networking, and LAN/WAN Management/Manager

BIO

Rare and on the surface appearing niche, yet looks more to the reaction to a quick or projected up-and-coming trend. While it might look here-today, gone-tomorrow, the jobs are likely the same. A smaller group and one that likely speaks to an immediate need that often trends down and often does not require an associates degree.

Declining, but likely hit Steady State

DECLINE PROGRAM PERSONA #1

% Composition: 7% of all Programs

@ TCL: One program (Civil Engineering Technology)

DEMAND: HIGH (85TH) → 46TH (Lower 25) – 85th (Median) – 93rd (Upper 25)

Y-t-Y GROWTH: Low to moderate growth trajectories year over year, notably in '16 and '17 when steady state is achieved.

3-PERIOD TREND: Low to no growth trend over three year intervals.

TOP CIP FAMILIES: (1a) Education; (1b) Business; (3a) Health Professions; (3b) Engineering Technology; (5a) CIS; (5b) Visual and Performing Arts

Example Programs:

- Data Modeling/Warehousing and Database Administration
- Medical Insurance Specialist/Medical Biller
- Plumbing Technology/Plumber
- Civil Drafting and Civil Engineering CAD/CADD

BIO

One of the greatest variances among all groups, we finally see education programs emerge as a top category. Much like the Inverted-U, we have the tail end of here-today, gone tomorrow, but are seeing a leveling off of the total production. Top programs that led to jobs in the early periods have hit steady state, thus the production declined, and likely has caught up to the job demand.

Slow Fall

DECLINE PROGRAM PERSONA #1

% Composition: 5% of all Programs

@ TCL: Two programs (Child Care and Support Services Management; Registered Nursing/Registered Nurse)

DEMAND: MODERATE TO HIGH (69TH) → 54TH (Lower 25) – 69th (Median) – 83rd (Upper 25)

Y-t-Y GROWTH: A majority of programs show one to throw year over year growth periods.

3-PERIOD TREND: Most have no or one unit of three-year trend growth.

TOP CIP FAMILIES: (1) Business; (2) Health professions; (3a) Visual and Performing Arts; (3b) Family and Consumer Sciences

Example Programs:

- Registered Nursing/Registered Nurse
- Culinary Arts and Related Services, Other
- Computer Programming, Other
- Music Performance, General

BIO

The word “Other” shows up here fairly often for the small portion of what falls into this category. The fall isn’t as aggressive as the next category, but the end result is evident. It looked sustainable, but was likely replaced by something general or more fitting. This is likely nothing more than a classification change, as programs go back to generalized, or more specific. Also the possibility that some programs just don’t fit in the two-year space. Several programs show up that are surprising, like Nursing and Hospitality Administration, but are likely headed for course correction and steady state approach within the next two years.

Hard Fall

DECLINE PROGRAM PERSONA #2

% Composition: 10% of all Programs

@ TCL: Five Programs (Paralegal; Interdisciplinary Studies, Other; Criminal Justice/Safety Studies; Radio Tech; Admin Assistant/Secretarial Science)

DEMAND: HIGH (82nd) → 59TH (Lower 25) – 82nd (Median) – 91st (Upper 25)

Y-t-Y GROWTH: A majority of programs only have one growth year; two to three is rare.

3-PERIOD TREND: No 3-year growth trends observed by 90% of programs.

TOP CIP FAMILIES: (1) Health Professions; (2) Visual and Performing Arts; (3) Engineering Technologies; (4) Homeland Security, Law Enforcement, etc.; (5a) CIS; (5b) Education

Example Programs:

- Web/Multimedia Management and Webmaster
- Criminal Justice/Safety Studies
- Nuclear Medical Technology/Technologist

BIO

One of two things is happening here. Either the program has completely fallen back to each, or the shifting of CIPs as a result of a demand adaptation or occupational change. An example here is the shift of Criminal Justice to a new CIP coding category. These are mostly high demand programs, or once were that have fallen on hard times. Another side is a set of key words in that of technologist or technician. There are also a number of degree programs that have fallen the way of informal web training being faster, more productive and cheaper than achieving a degree.

Programs Worth Watching

ON-THE-FENCE PROGRAM PERSONA #1

% Composition: 7% of all Programs

@ TCL: No programs

DEMAND: LOW TO MODERATE (42nd) → 37th (Lower 25) – 42nd (Median) – 48th (Upper 25)

Y-t-Y GROWTH: A majority of programs saw around two-thirds of year over year growth.

3-PERIOD TREND: Most programs had growth in two-thirds or more three-year periods.

TOP CIP FAMILIES: (1a) Business; (1b) Transportation and Materials Moving; (1c) Health Professions

Example Programs:

- Project Management
- Modeling, Virtual Environments and Simulation
- Adult and Continuing Education and Teaching

BIO

The newer wave of business and health that could be programs that take off or fall flat. They look great on paper and with what the market says across the board, but the demand for a bachelor's degree in the field may prove impactful. Nonetheless, these are programs we have seen in many other studies of this type and just keep showing up regardless of our efforts.

Out of Left Field

ON-THE-FENCE PROGRAM PERSONA #2

% Composition: 2% of all Programs

@ TCL: No programs

DEMAND: MODERATE (60TH) → 37TH (Lower 25) – 60th (Median) – 79th (Upper 25)

Y-t-Y GROWTH: Either no observable growth due to new entry or 100% year over year growth.

3-PERIOD TREND: Either no observable growth due to new entry or 100% year over year growth.

TOP CIP FAMILIES: (1) Health Professions; (2) Interdisciplinary Studies

Example Programs:

- Electromechanical Engineering
- Jewish/Judaic Studies
- Applied Behavior Analysis
- Security and Loss Prevention Services

BIO

Admittedly the programs that didn't exist and we had to look up some of (like Talmudic Studies). The jury is out on whether or not they stick, but the demand caught up in a hurry.

“Meh”

NO-GO PROGRAM PERSONA #1

% Composition: 8% of all Programs

@ TCL: No programs

DEMAND: LOW (25TH) → 20TH (Lower 25) – 25th (Median) – 30th (Upper 25)

Y-t-Y GROWTH: About half or less year over year growth for a majority of programs, albeit small scale growth.

3-PERIOD TREND: Variable three-period trends, all of which are small growth with small bases.

TOP CIP FAMILIES: (1) Health Professions; (2) Visual and Performing Arts; (3) Business

Example Programs:

- Wine Steward/Sommelier
- Bioinformatics
- Stringed Instruments
- Health Unit Manager/Ward Supervisor

BIO

Niche or on the verge of non-existent or replaceable, these programs are nothing much to be excited about. Virtually no spread in demand, thus are there, but could go any way. Few were once prominent, so another “it is what it is,” but with minimal or spotty demand.

% Composition: 22% of all CIP codes

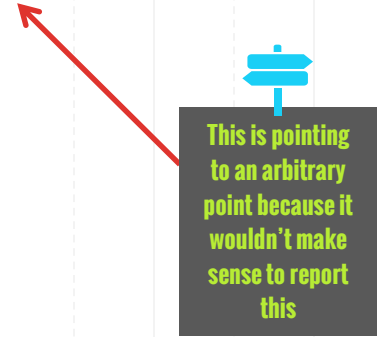

@ TCL: No Programs

DEMAND: NONE (8TH) → 0 (Lower 25) – 8th (Median) – 15th (Upper 25)

Y-t-Y GROWTH: No to limited trends (one-hit wonders that didn't survive)

3-PERIOD TREND: No to limited trends (one-hit wonders that didn't survive)

TOP CIP FAMILIES: (1) Health Professions; (2) Education; (3) Engineering; (4) Business; (5) Biological and Biomedical Sciences

Example Programs:

- Word Processing
- Lactation Consultant
- Knowledge Management
- Marketing Research
- Fashion Modeling

BIO

One of four things here. They pivoted to another CIP. Two, the key word: “Other”, thus relevant at one point or attempting to be, but not anymore. Three, they sounded like a winner given the market or mirroring four-year but just hasn't taken off. Or just plain extinct because of markets and for some reason still exist. The long and short of it is, *they gone*.

SC Technical College Program Counts

So we have seen trend. Let's add demand into the equation.

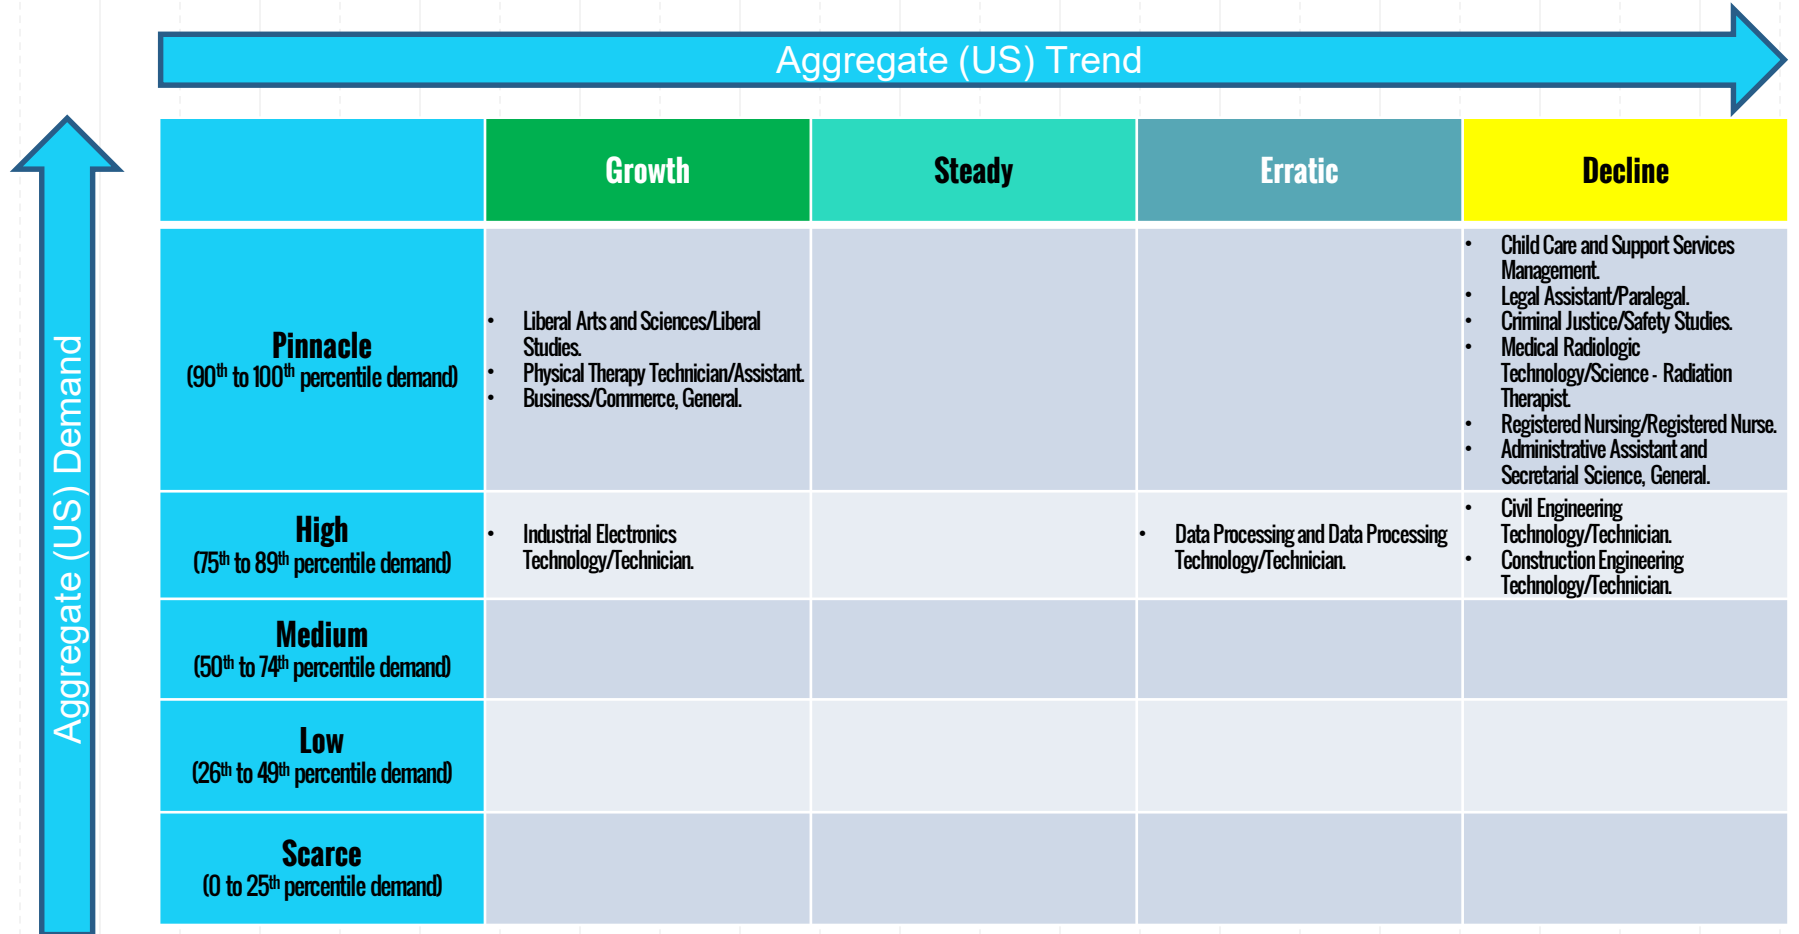

How are our programs sitting at the aggregate level?
Are we in a prime position in terms of portfolio?

Aggregate Demand vs. Aggregate Program Growth Trends of TCL Programs

	Aggregate (US) Trend			
	Growth	Steady	Erratic	Decline
Pinnacle (90 th to 100 th percentile demand)	3 Programs			6 Programs
High (75 th to 89 th percentile demand)	1 Program		1 Program	2 Programs
Medium (50 th to 74 th percentile demand)				
Low (26 th to 49 th percentile demand)				
Scarce (0 to 25 th percentile demand)				

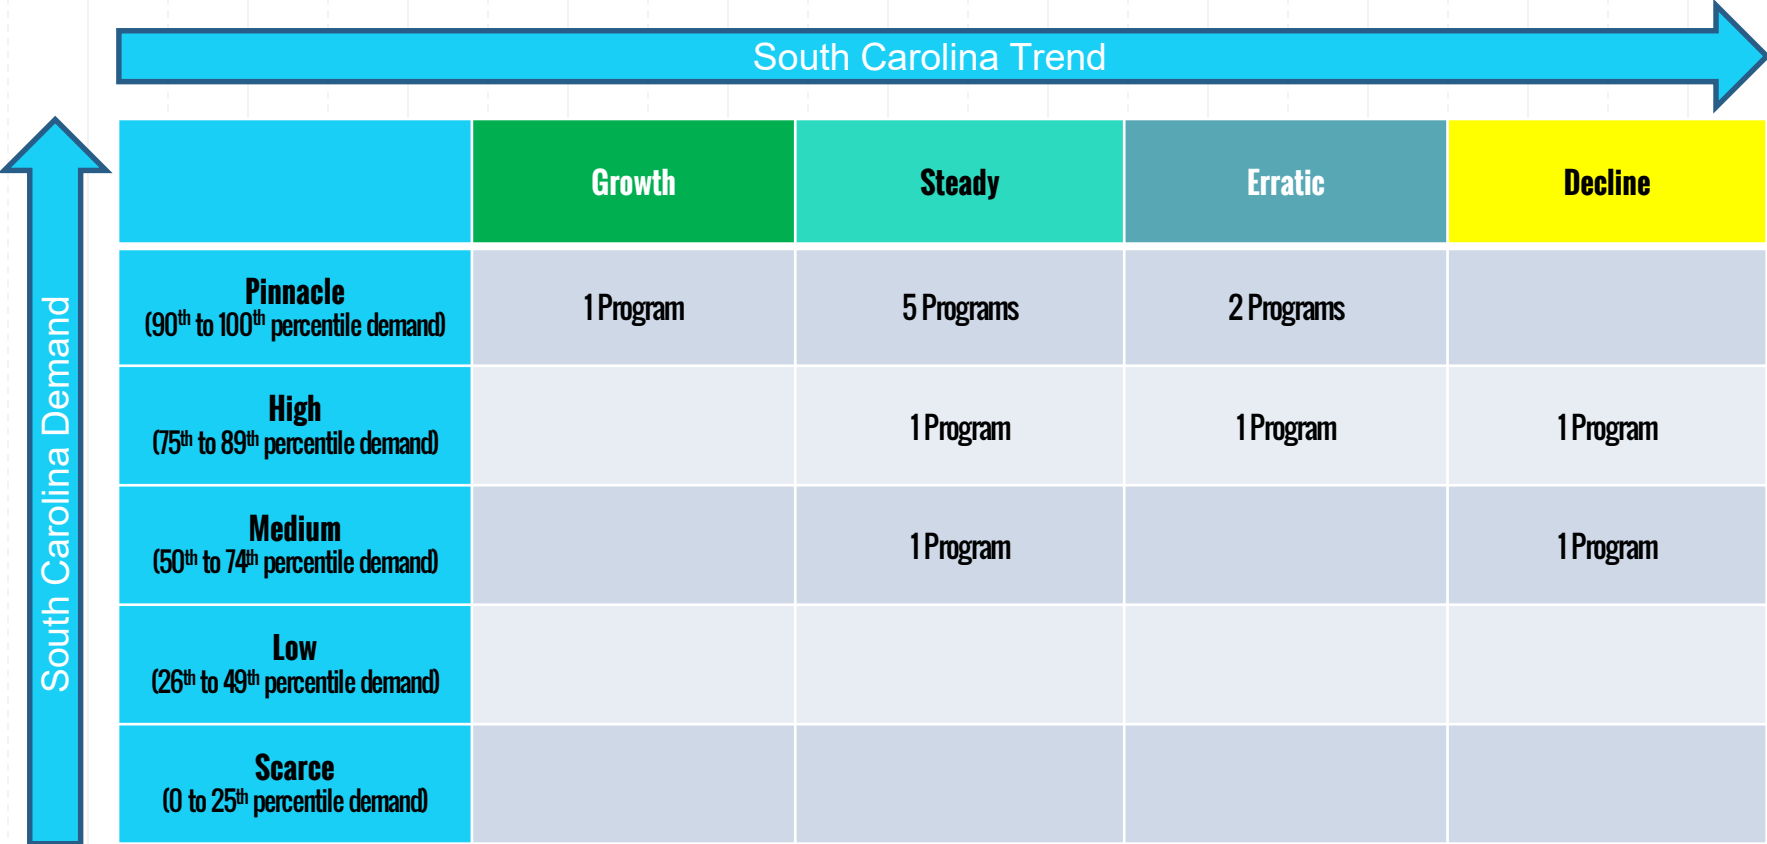

Aggregate Demand vs. Aggregate Program Growth Trends of TCL Programs

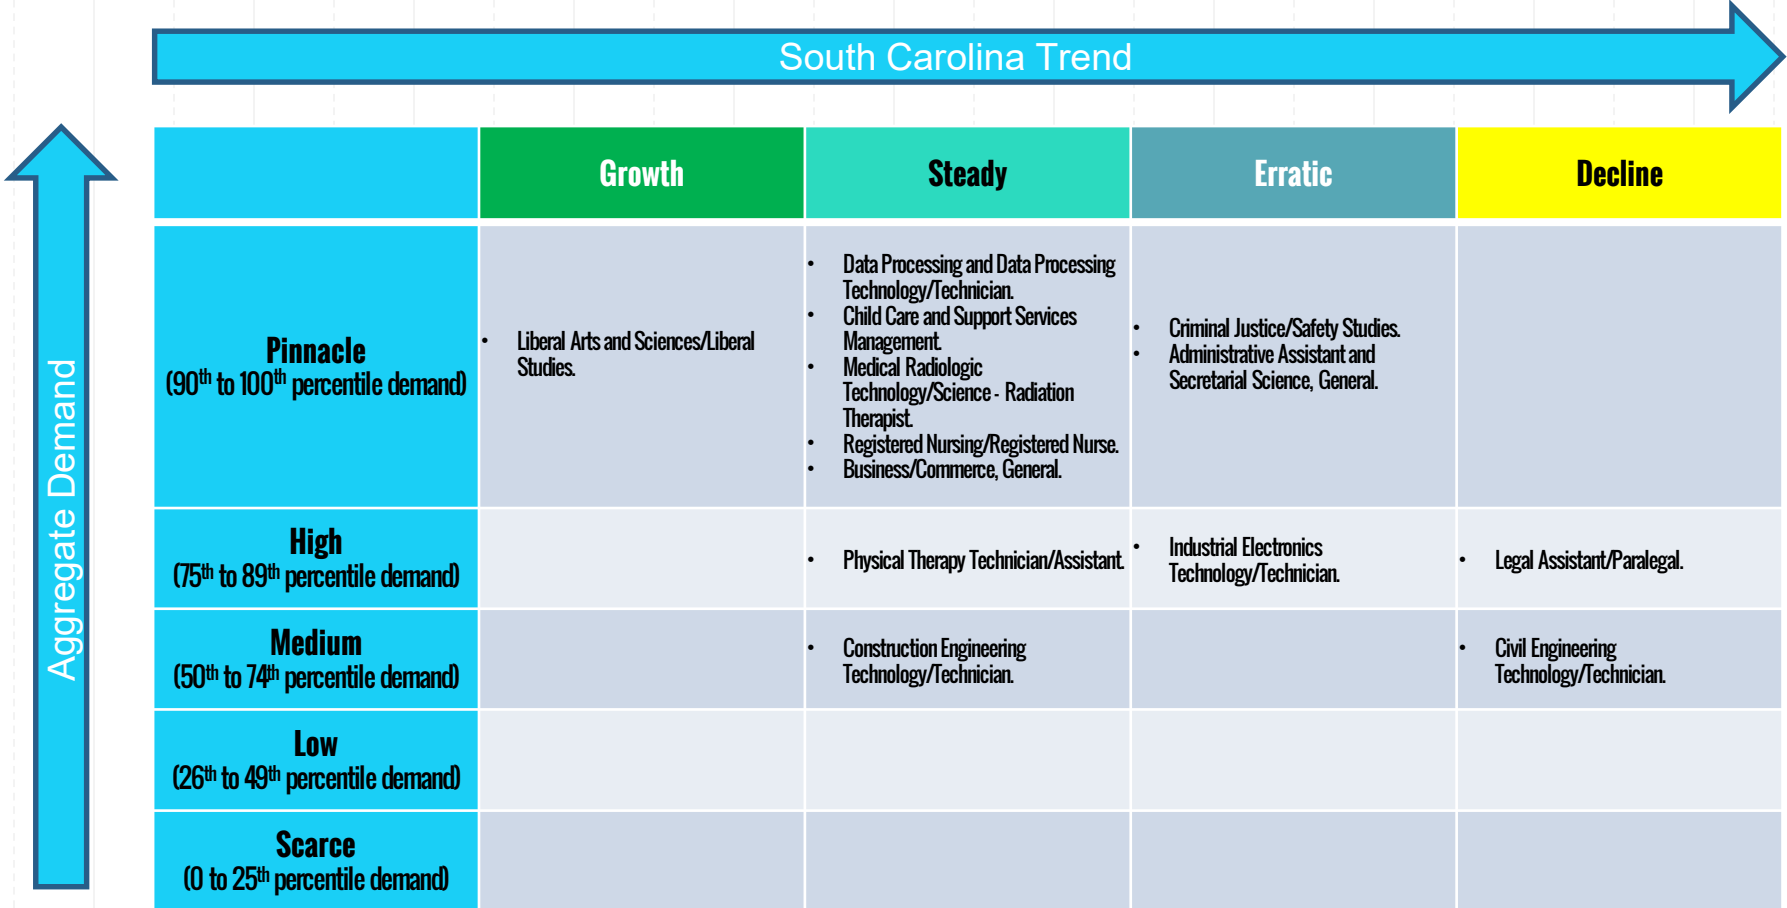

How does this matrix fare in South Carolina?

South Carolina Demand vs. South Carolina Program Growth Trends of TGL Programs

South Carolina Demand vs. South Carolina Program Growth Trends of TGL Programs

Jobs

Facts, Trends, and Early Indicators

6

What we will explore

- ◆ What does the workforce look like?
- ◆ What are the job count trends year over year?
- ◆ Where are the jobs in the state?
- ◆ What does education and experience say about the chances of getting a job in the Beaufort-HHI MSA?
- ◆ What are the top skills in demand?
- ◆ What are the top industries employing? Top occupations? Top employers? And top locations?
- ◆ What about “Hard to Fill” jobs?
- ◆ **Then, finally, we will do a review of the occupational outlook for current programs...with some facts and early reveals first**

So far we have already discussed:
PROGRAM TREND PERFORMANCE • PROGRAM DEMAND •
PROGRAMS WINNING AT PEER INSTITUTIONS.

Now let's add some criteria.
And some facts to go along with it...

Programs → Jobs

TCL's 16 programs link to 37 unique jobs →
2.3X jobs per program.

Jobs → Programs

On the flipside, those 37 unique jobs link to 98 degree
programs → 2.64 degree codes per jobs.

Associate's as Entry

19 of the 37 unique jobs have a 25% or greater employment with an Associate's degree; of the remaining, 11 are unknown degree level, and the remaining six are bachelor's or higher, however, four are postsecondary teachers (the other two are Chief Executives and Management Analysts).

Associate's as Entry/Associate's in Marketplace

Among those 37 jobs, 8 have an Associate's degree as the typical point of entry. Three have postings of 25% or greater desiring an Associate's. 19 have 25% or more Associate's degrees serving those jobs; only four are at 50% or greater.

Associate's in Marketplace

There are 840 unique jobs; 284 of those unique jobs have a 25% or greater Associate's degree; 44 have 50% or greater.

Market Quotient

We developed a *Labor Area Quotient*, which is a calculation of a job's unique share of total employment in the market relative to the share nationally.

There are 60 unique jobs with Quotients greater than two (90 at 1.5X or better); four require Associate's degrees, and TCL has two programs to fit those four.

Market Quotient

There are six jobs with Quotients greater than 2 and 50% or more have Associate's; however, there are 144 unique jobs with Associates at 25% and above with Quotients greater than 2.

MSA Postings Trend (>50 over twelve months)

There are 45 jobs with more than 50 unique job postings in the last 12 months in the MSA.

Nine of these jobs have at least of quarter of postings desiring an Associate's degree. Three of these jobs have a 50% or more Associate's degrees in the labor market (Surgical Tech, Licensed Practical and Vocational Nurses, Medical Assistants), with 38 jobs having 25% or more with Associate's degrees.

MSA Postings Trend (>100 over twelve months)

There are 22 unique jobs with 100 or more postings in the last 12 months, with seven having that same quarter or more postings with an Associates as the typical education for entry. 19 of those 22 have Associate's degrees among 25% of the labor force, but none with 50% or greater.

Projected Job Growth (Bright Outlook)

Among the 584 jobs with a state-level projection to 2026, 49 are predicted to grow 15% or more over that period. Two of 49 require Associate's degrees (PT Assistant; HR Assistant).

Another five have 25% or more job postings desiring an Associate's degree. 36 jobs have 25% or greater Associate's degrees serving those jobs; three with 50% or greater.

Projected Job Growth (Bright Outlook)

Nationally, 94 are predicted to grow 15% or more over that period. Eight of 94 require Associate's degrees. 35 jobs have 25% or greater Associate's degrees serving those jobs; 14 with 50% or greater. And they aren't all the same at the state level.

Projected Job Growth (Bright Outlook)

Only ten jobs are expected to grow 15% or more statewide with 50 or more job postings in the last 12 months. None require an Associate's degree. Two jobs have 25% or greater postings desire an Associate's degree (CSRs, Stock Clerks). Seven jobs have 25% or greater Associate's degrees filling those jobs. None at 50% or greater. *So, no one has been neglectful.*

Risk of Automation

408 jobs are graded on the risk of automation.

202 are low risk; 102 are medium risk; 103 are high risk.

Of the high risk, 22 are tied to CIP family 52, while only 10 are tied to 51, 12 tied to CIP 19, 5 tied to CIP 15, and one tied to 19.

Risk of Automation

Among high risk automation jobs, 85 have 25% or more employment with Associates degrees, while 115 are low risk.

Among the 41 jobs where 50% or more have Associates degrees, only three are high risk for automation, 11 at medium risk, the remaining 26 are low risk.

Jobs to Programs

341 programs have at least 1:1 jobs to programs matching.
Among the 33 coded to Associates as typical education needed for entry, only 9 fit the bill.

Jobs to Programs

Among those 341 programs with at least 1:1, 109 (of 177 known) have a labor market with 25% or greater Associates degrees; 23 with 50% or greater Associates (of the 44 Total!)

Jobs to Programs

11 of 15 TCL programs have at least 1:1 jobs per program.

**What is the occupational outlook
for our current programs?**

**Let's put it all together -
Programs + Jobs**

Program Evaluation Criteria: PROGRAM FACTOR DEFINITIONS

A total of 19 factors were used to grade all Associates degree programs.

- ◆ **NON-GRADED CRITERIA** – Factors not used as a form of points, but important to note in review
 - ◆ **CIP Family** (Not a grading criteria) – Code of primary family for the academic program code
 - ◆ **Count of Jobs** (Not a grading criteria) – Number of jobs tied to the academic program code, and used to generate a weight for each item categorized into occupational outlook.
- ◆ **PROGRAM FACTORS** – Factors specific to growth, trend, and demand of academic programs.
 - ◆ **Program Trend, US** – Where the program sits in the program persona category, looking at growth cycles and trends of programs in the US and the moving average trend from 2010 to 2017, paired with growth to determine the fit of the growth.
 - ◆ **Program Trend, SC** – Same criteria as trend in US, but based to SC numbers.
 - ◆ **Demand Category, US** – Percentile rank of each program at each program level nationally – tells us how widely available and in-demand each program sits currently.
 - ◆ **Demand Category, SC** – Same criteria as demand in US, but based to SC numbers.
 - ◆ **Winning Peer Program** – One of the peer schools is enjoying favorable trend for that program.

Program Evaluation Criteria: JOB OUTLOOK DEFINITIONS

- ◆ **JOB OUTLOOK FACTORS** – Multiple criterion in terms of job outlook as listed in Occupational Outlook, specifically job ties to Associates degree title, job growth, degree level expectations and current proportions for associates degree workers, and risk of automation.
- ◆ **Weighing Factors:**
 - ◆ **# of Jobs >= to # of Programs** – Percent of job codes tied to the degree program outweigh the number of program codes tied.
 - ◆ **No SC Degrees, but Jobs** – There are jobs in South Carolina, but not direct degree ties.
- ◆ **MSA Factors:**
 - ◆ **MSA > 50 Jobs** – Percent of job codes tied to degree program where there have been 50 job postings in Beaufort/Bluffton/HHI MSA in the last twelve months.
 - ◆ **MSA > 100 Jobs** - Percent of job codes tied to degree program where there have been 100 job postings in Beaufort/Bluffton/HHI MSA in the last twelve months.
 - ◆ **MSA Quotient > 1.5** – Percent of job codes tied to degree program where the number of job postings is 1.5X the total postings in the state of SC.
 - ◆ **MSA Quotient > 2** - Percent of job codes tied to degree program where the number of job postings is 2X the total postings in the state of SC.
 - ◆ **Sav. MSA > 100 Jobs** - Percent of job codes tied to degree program where there have been 100 job postings in the Savannah, GA MSA last twelve months.
- ◆ **Growth and Sustainability Factors:**
 - ◆ **13.5% or more growth – US** – Forecasted growth is 13.5% or above over a ten year period, referred to as “Bright Outlook” jobs.
 - ◆ **13.5% or more growth – SC** – Forecasted growth is 13.5% or above over a ten year period, referred to as “Bright Outlook” jobs.
 - ◆ **NOT Automation Risk** – Percent of jobs not tied to a risk of automation.
- ◆ **Associate Degree Factors:**
 - ◆ **>25% Assume Associates** – Percent of jobs where more than 25% of job postings assume an Associate’s degree is a requirement.
 - ◆ **>25% Have Associates** – Percent of jobs where more than 25% of those employed in those jobs have an Associates degree.
 - ◆ **>50% Have Associates** – Percent of jobs where more than 50% of those employed in those jobs have an Associates degree.
 - ◆ **Associate Degree Typical Entry** – Percent of jobs with the presumption that the Associate Degree is most frequent requirement (from different source).

Rundown of Total Performance - Tier 1 & 2 Programs

- ◆ There are a total of 854 programs evaluated that tied cleanly to at least one job.
- ◆ All Tier One programs have aggregate performance scores that are two standard deviations or more greater than the mean overall score.
 - ◆ Tier One saw 54 programs in this category, and it top-heavy in several CIP families.
 - ◆ CIP Family 51 (Health Professions and Related Programs) = 25 (of possible 121)
 - ◆ CIP Family 15 (Engineering Technologies and Engineering Related Fields) = 9 (of possible 54)
 - ◆ TCL has two Tier One programs: PT Assistant & Business Commerce
- ◆ All Tier Two programs have aggregate performance scores that are 1.5 to less than 2 standard deviations greater than the mean overall score.
 - ◆ Tier Two saw 43 programs in this category, and slightly greater spread than Tier One.
 - ◆ CIP Family 51 (Health Professions and Related Programs) = 7 (of possible 121).
 - ◆ CIP Family 15 (Engineering Technologies and Engineering Related Fields) = 5 (of possible 54).
 - ◆ TCL has two Tier Two programs – Liberal Arts & Sciences & Rad Tech

Let's see the Tier One & Tier Two Programs...

Applicant

Trends, Performance, and Other Musings

7

Include in this section

- ◆ Applicant trending via multiple looks.
- ◆ What has changed, who is performing well, etc.?
- ◆ What are some important fluctuations?
- ◆ NOTE: This is an early look. We are far from complete in Applicant.

Total Applicant Trend

of Associates Applicants x Programs Applied into

Applicant Trend

- ◆ Cert share has declined, though explained more so by increased demand for debuting programs.

■ ASSOCIATE DEGREE ■ CERTIFICATE ■ DIPLOMA ■ NON DEGREE DUAL ENROLLED ■ UNDETERMINED

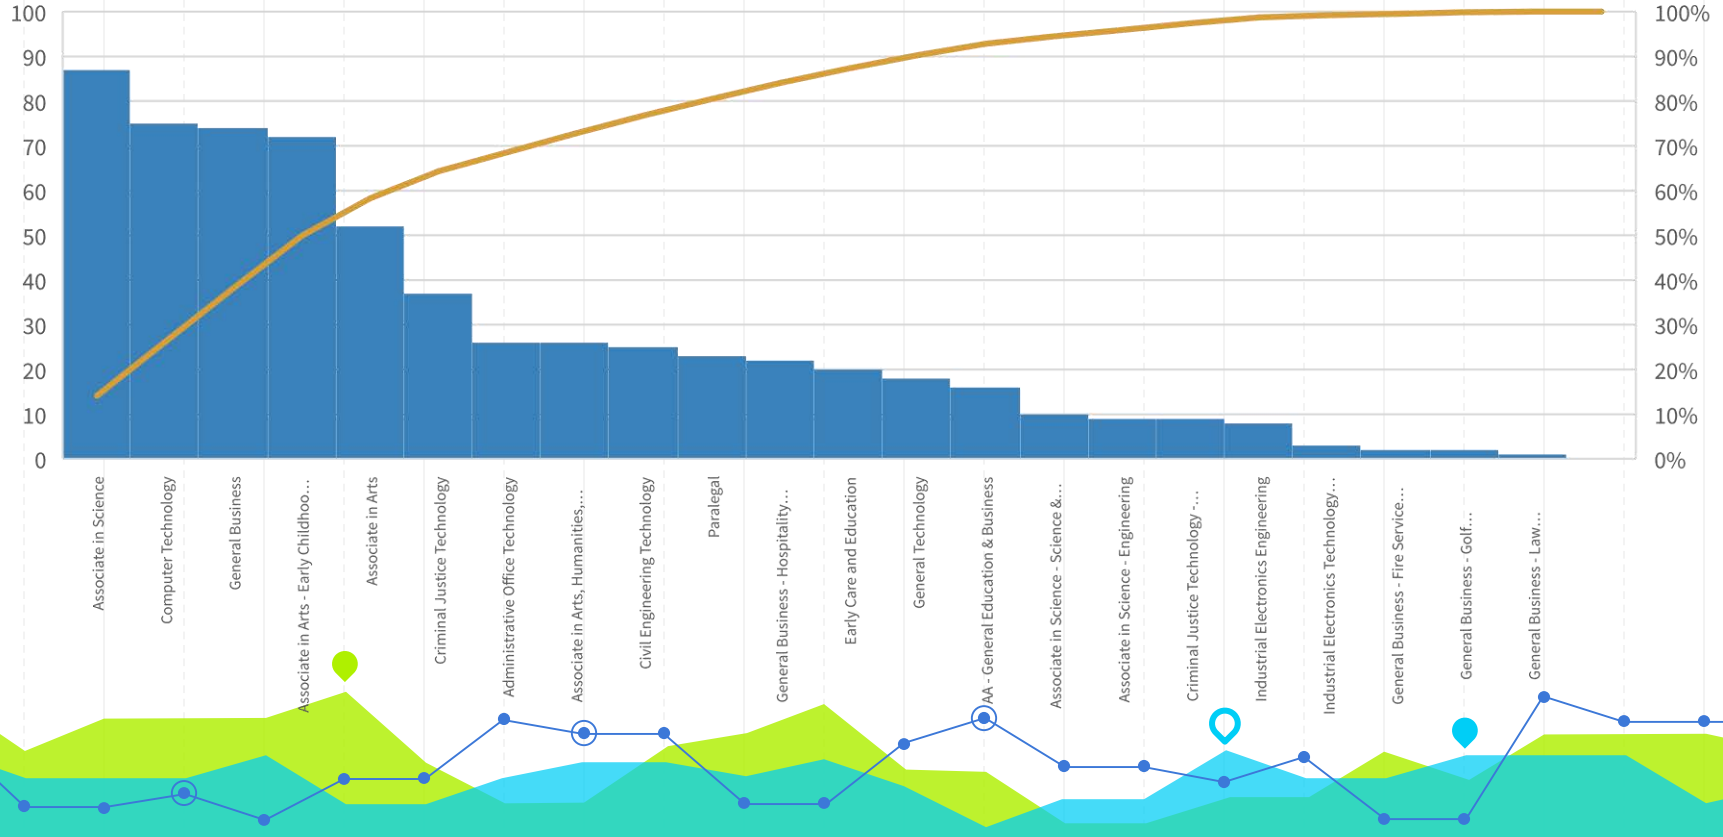

Fall 2018 Applicant Pool

◆ Total Applications = 1,642; 27 programs; Top-heavy in recently debuting programs.

Fall 2013 Applicant Pool

◆ Total Applications = 617; 22 programs

Fall 2008 Applicant Pool

◆ Total Applications = 475; 23 programs

Fall 2003 Applicant Pool

◆ Total Applications = 286; 18 programs

Student Type by Year

◆ High School students taking courses for credit has grown. It should grow more.

■ First-Time Freshman ■ First-Time Transfer ■ Hs Student Taking College Crs ■ Readmit ■ Special ■ Transient ■ Unknown

Ethnicity Apps by Year

◆ Trends are relatively consistent across ethnicity.

■ Multi-Ethnic ■ Hispanic ■ Black/African American ■ White/Non-Hispanic

Gender Apps by Year

◆ Women applicants are growing more so by numbers.

Spread of Fall Applications

- ◆ Note the spread over a ten year period.

Fall 2018
